

## **Geography Intent at The Portsmouth Academy**

Geography at TPA is designed to inspire pupils to become global citizens and to understand their responsibilities to other people, the environment and to the sustainability of the planet.

We do this by developing an understanding of the process- both human and physical- that shape the world. Our aim is to develop independent learners well equipped to tackle the global challenges that face the Earth and their future.

Our curriculum helps students build the vocabulary they need to explore, talk about, and make sense of the world—and figure out where they fit into it.
