

Knowledge Organiser – Entrepreneurs project

Mass Production:

Mass production, also known as flow production or continuous production, is the production of substantial amounts of standardized products in a constant flow, including and especially on assembly lines.

- prototype or one-off production.
- batch production.
- mass production or high volume.
- continuous production

Batch Production:

Some promotional books and magazines are printed in a batch, EG. a programme for an event such as a sports fixture, listing teams and other information. These would be produced in a large quantity, but only once.

One-off Production:

Most boards are very suitable for manufacturing a prototype due to the very low cost and ease of manipulation of the material. Many architecture firms use foam-core board to make prototype display models to present to clients.
