

Knowledge Organiser

Brief – The design task, what you have to do
Client/User – Who it is made for, someone you interact with throughout the project

Function - The product function and purpose refers to what the product does and when it might be used.

Materials – What you will use to make the final product

Component – Something pre-made that you buy in to help make your final outcome.

Client Feedback – This is when you ask your user/client for their viewpoint about your designs/final product. It helps to keep the quality high.

Materials

Cardboard

Rigid
Solid
Corrugated
